Gold lower, in New York at noon 106, here 105@105\footnote{M}. A London dispatch says: "It seems to be a matter of surprise that stocks should not go down instead of no, because of the unsatisfactory situation."

January last, when it was thought there would be no war, the takings of European spinners were 606,566 bales against 514,600 to bales for January 1876. But in February and March the fear of war daily grew and the takings of cotton by the spinners were greatly reduced, but in April, after the war had actually begun, there was a rally and the comparative takings show up prise that stocks should not go down instead of up, because of the unsatisfactory situation in France, the tension of her relations with Germany and Italy, and utter uncertainty regarding events which may grow out of the house Turkish war. But a strong party in France are supporting the bourse for political and judging by the reports of cotton in sight and actually begun, there was a rally and the comparative takings show up as follows: April, 1877, 398,541 bales; April, 1876, 399,256 bales. There are, from May to October, five months yet to be covered by receipt in these estimates of Ellitson & Co., and judging by the reports of cotton in sight and judging reasons, and are assisted by speculators for a rise. The ultimate success of Russia is redeficiency of 328,000 bales as compared with garded as certain, and supports Russian bonds, and the reduction of the discount rate of the Bank of France is directing money to investment in government stocks. The St. Louis Republican, of Wednesday, reported: uission merchants are sending a good deal of money out into the country to secure shipments of new wheat. Texas is promising a pretty full supply, and it is good wheat, too, of both the red and white varieties. The cotton-growers are also asking for considerable sums to carry them through to picking time. About the usual amount of paper offered for discount comes from merchandisers, and is comprised of the 30,60 and St day notes given to them for goods by country merchants. The aggregate of this class of paper is large enough to show that the merchandise trade of the week has been quite good. Shippers have not been large borrowers during the past week, as there has been very little stuff going forward, either to the east or the south. Money has been in abundant supply throughout the week, and freely furnished to all borrowers able to make acceptable paper at 8 per cent. COTTON. The cotton market yesterday lost the cheerful tone the New York advances of Thursday imparted, for New York lost 1-16c yesterday and there was dullness and little doing. In our market there was no spirit, with a mod-white, 60@65c per bushel. large proportion was of styles of which there is no demand. This checked what business energy existed, and the day's sales were moderate in amount at unchanged with the sales were moderate in amount at unchanged with the sales were moderate. moderate in amount at unchanged rates. On Tuesday, at New York, the report of the managers of the cotton exchange was read at the annual meeting. The last year has not been prosperous to those in the cotton trade, either as merchants or manufacturers, partly from a fear of a European war. It was thought at the date of the last annual report that bottom prices had been reached for staple commodities, but the depression continues, in spite of the large increase of transactions or the violent fluctuations in The working of the new system for conducting the business has worked admir-ably. The losses among members has been less than those of preceding years. The sales of contracts for the year ending May 28, 1877, were 9,986,800 bales. The total sales in the six years since the exchange was organized are 42,255,389 baies. The report shows that New York is losing ground as a cotton-trading point. The sales of actual cotton since last report were: For export, 128,503 bales; spinning, 230,560 bales; speculation, 49,784 bales; transit, 2161 bales; total, 411,058

bales. The total crop last season was 4,400,-000 bales, of which New York received only 935,000 bales, and sold only 411,00 bales, be-It was the first of the month yesterday, but the banks were as quiet as ever, and the says that these figures are calculated to exite lively apprehensions for the future. Wise legislation and hard work are needed to arrest the danger of losing the cotton trade Elliston's Liverpool circular has arrived, brokers, with little doing. A ND Proprieter of the Abstract of Land Titles in Tunica county, Mississippl. Look to your land titles. I have now complete, a perfect Abstract of Titles of all lands in Tunica county, Miss. as it was before portions of the same were taken for Tata and Quitman counties. This Abstract shows that there are very few perfect titles in Tunica county. Mississipple of them are utterly defective, and there are scarcely any that are not clouded by tax-titles. In some instances I find that valuable plantations, about the titles of which the holders have entertained no doubt, are held by titles that would avail nothing before a court, either in prosecuting or defending a suit in ejectment. The defects in these titles may generally be cured if they are ascertained at once and the proper remedy applied. I will furnish abstracts on short notice, charging one dellar for each conveyance noted on the abstract. Payable on delivery.
